LABOUR MANAGEMENT SYSTEM (LMS)

Maximise your warehouse throughput

Labour Management System **objectively measures your warehouse productivity** and detects improvement opportunities for your company.

The software **records the optimal time to carry out each task** and compares it with actual performance. The information collected by the software lets you objectively measure throughput to **optimise processes in your facility**.

BENEFITS OF LABOUR MANAGEMENT SYSTEM (LMS)

Maximised warehouse **productivity**

Detection of **improvement opportunities** in workflows

Workforce **planning**

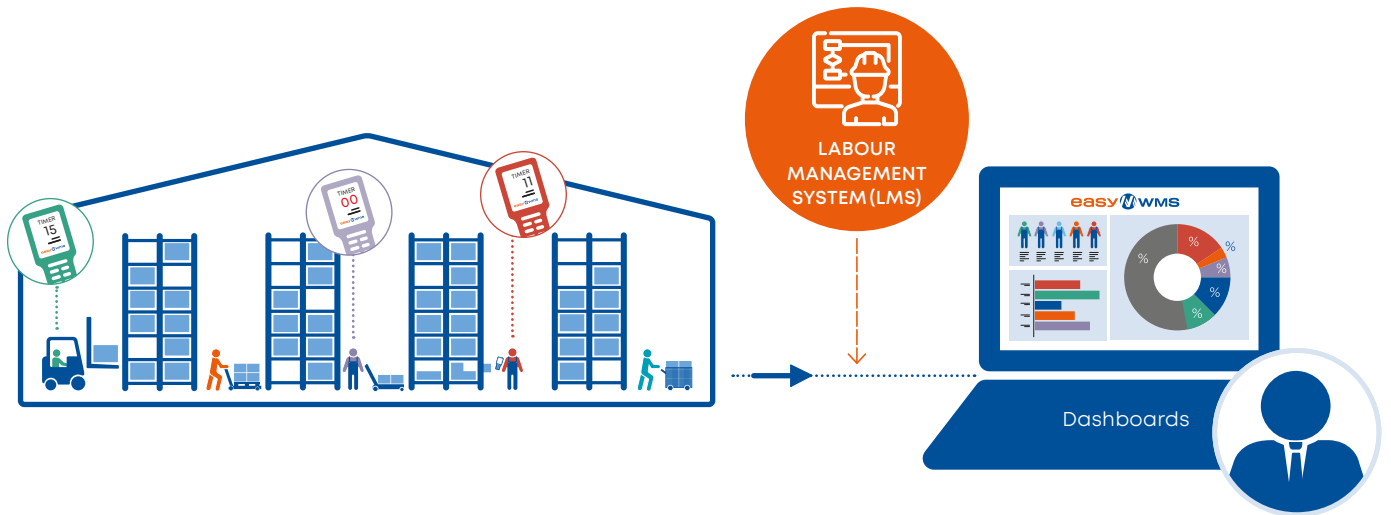

Increased operator **throughput**

Optimal execution of **tasks**

Comprehensive performance **control**

Labour Management System predetermines the necessary resources for maximum warehouse efficiency

OPERATION OF LABOUR MANAGEMENT SYSTEM (LMS)

Functions of Labour Management System (LMS)

-  Measure in detail the actual times of processes carried out in the warehouse
-  Compare actual times with target times to establish standards and individual or team performance
-  Detect inefficiencies in procedures to identify opportunities for improvement
-  Monitor key performance indicators (types of processes, work shifts, etc.)
